

Release Notes

FROM THE COMPANY MAKING MARKETERS POWERFUL.

Date: Apr 9, 2025

Version 1.1.0

Summary

In this release, we introduce the following changes:

- Enhanced chat experience
 - Chain of thought
- Suggested follow-up queries
- Augmented @Search responses
 - Profile page

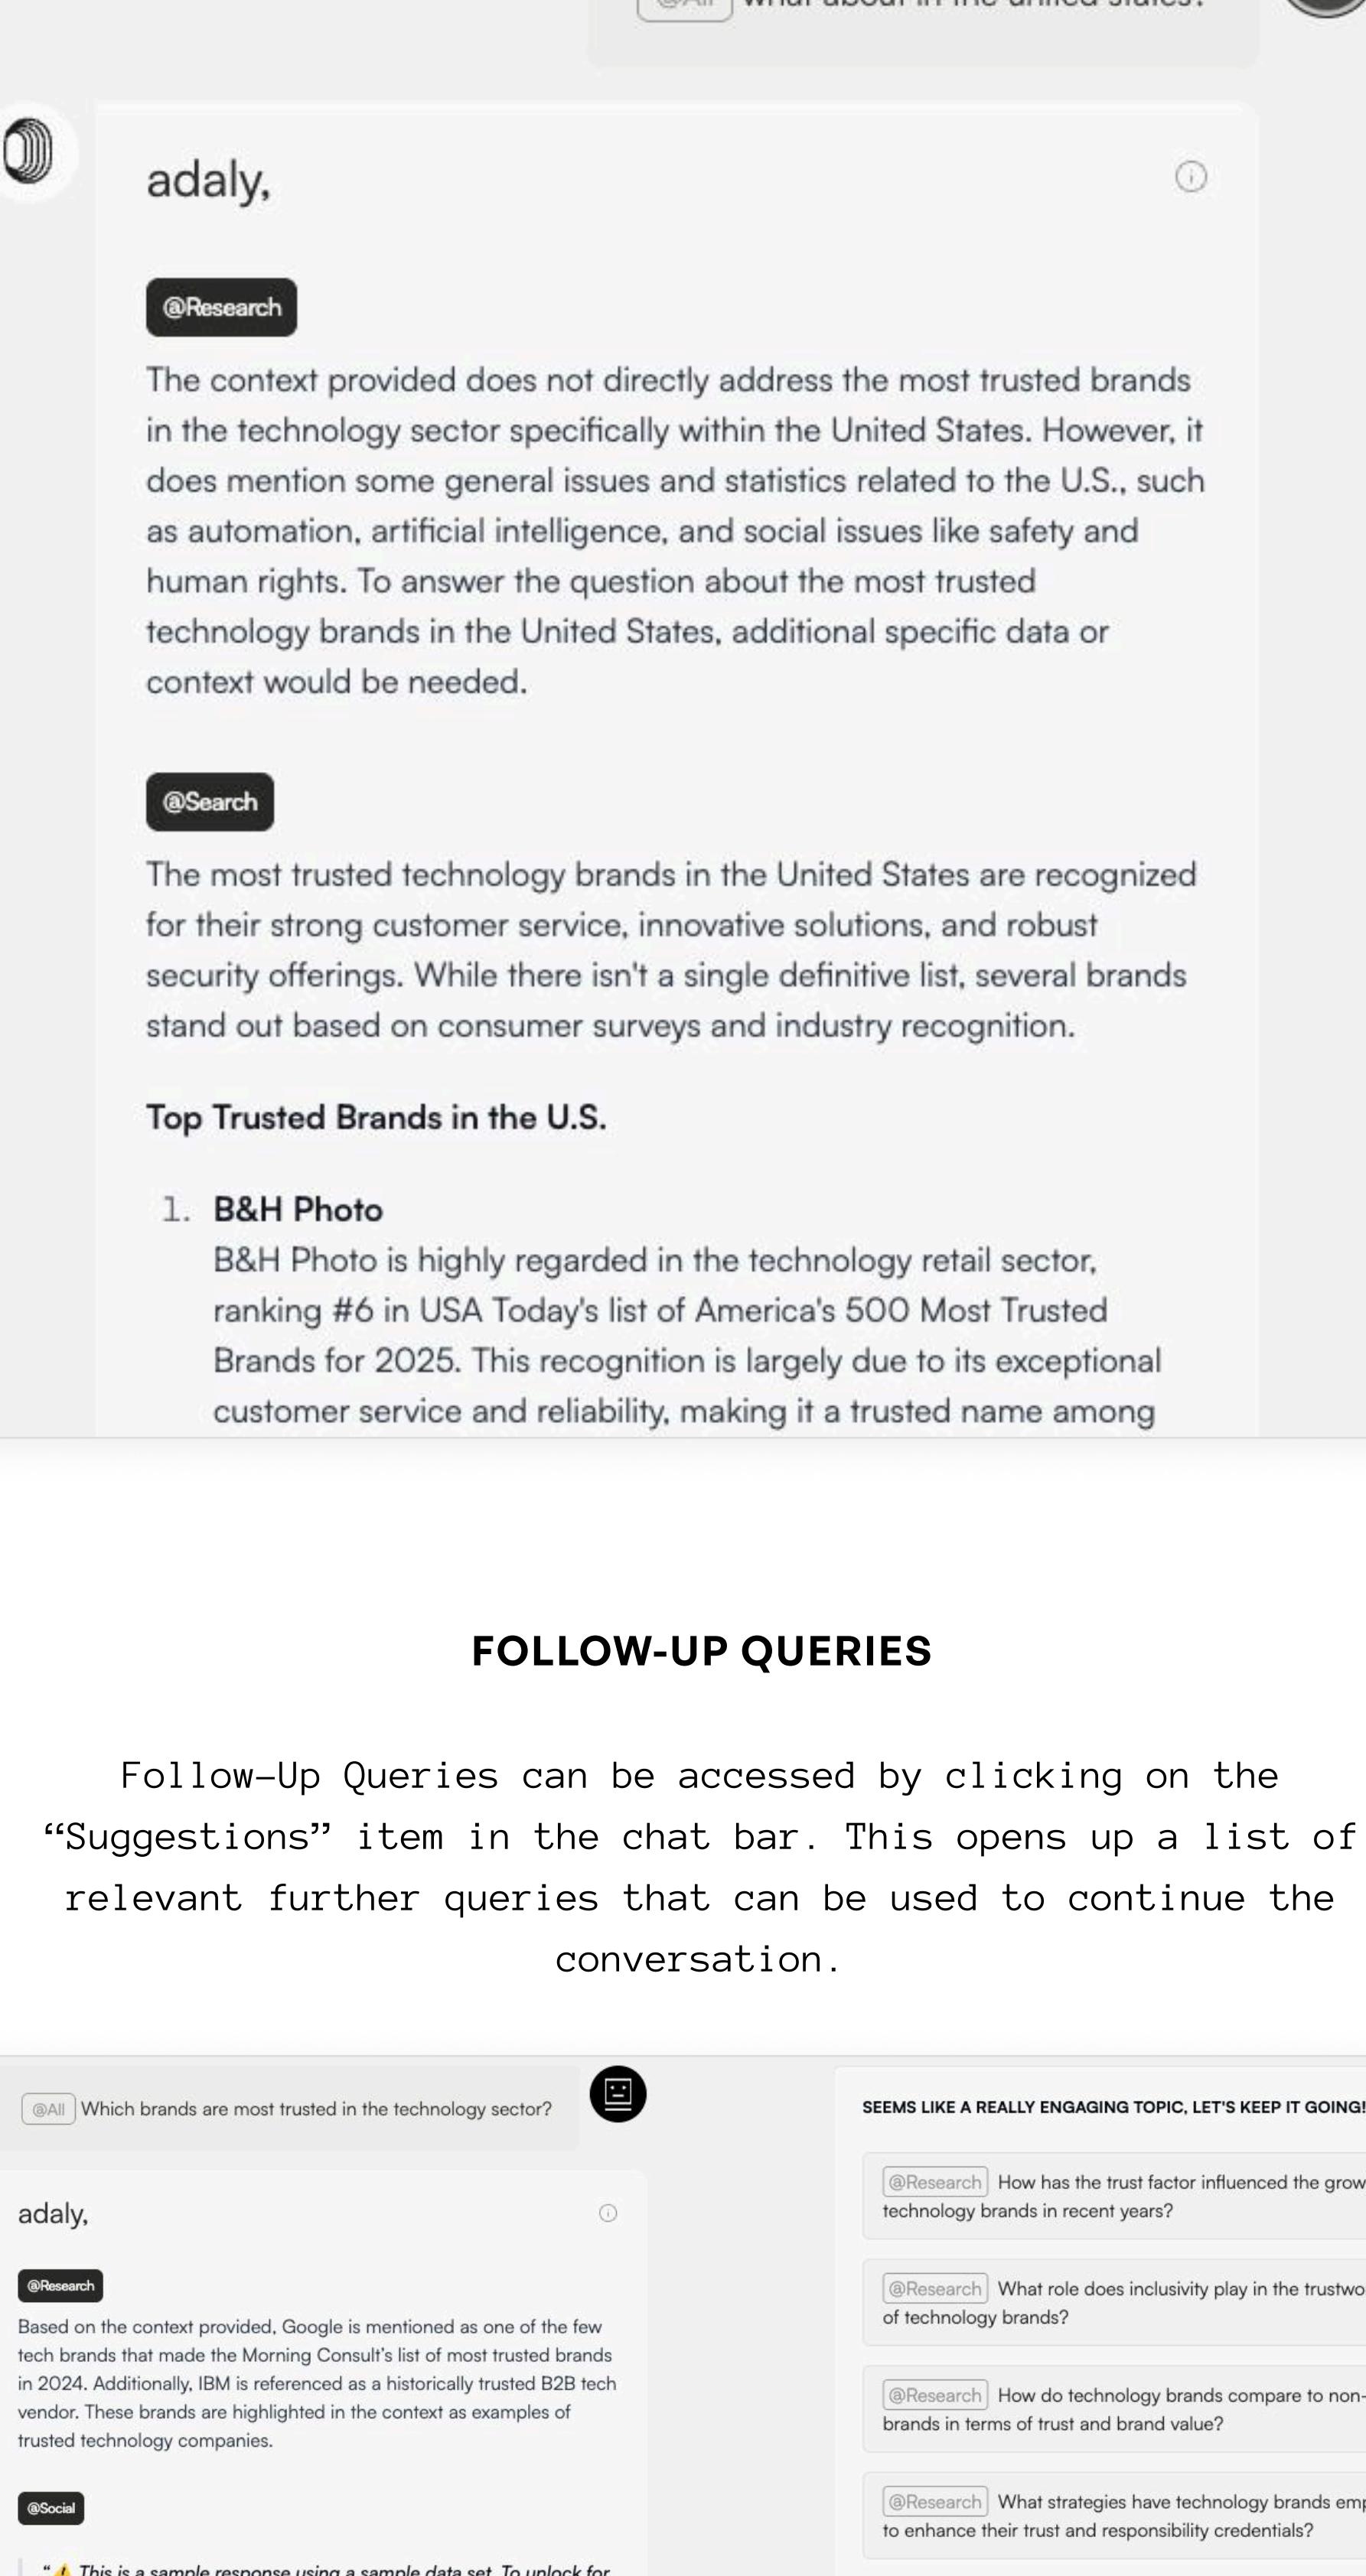

New Features

ENHANCED CHAT EXPERIENCE

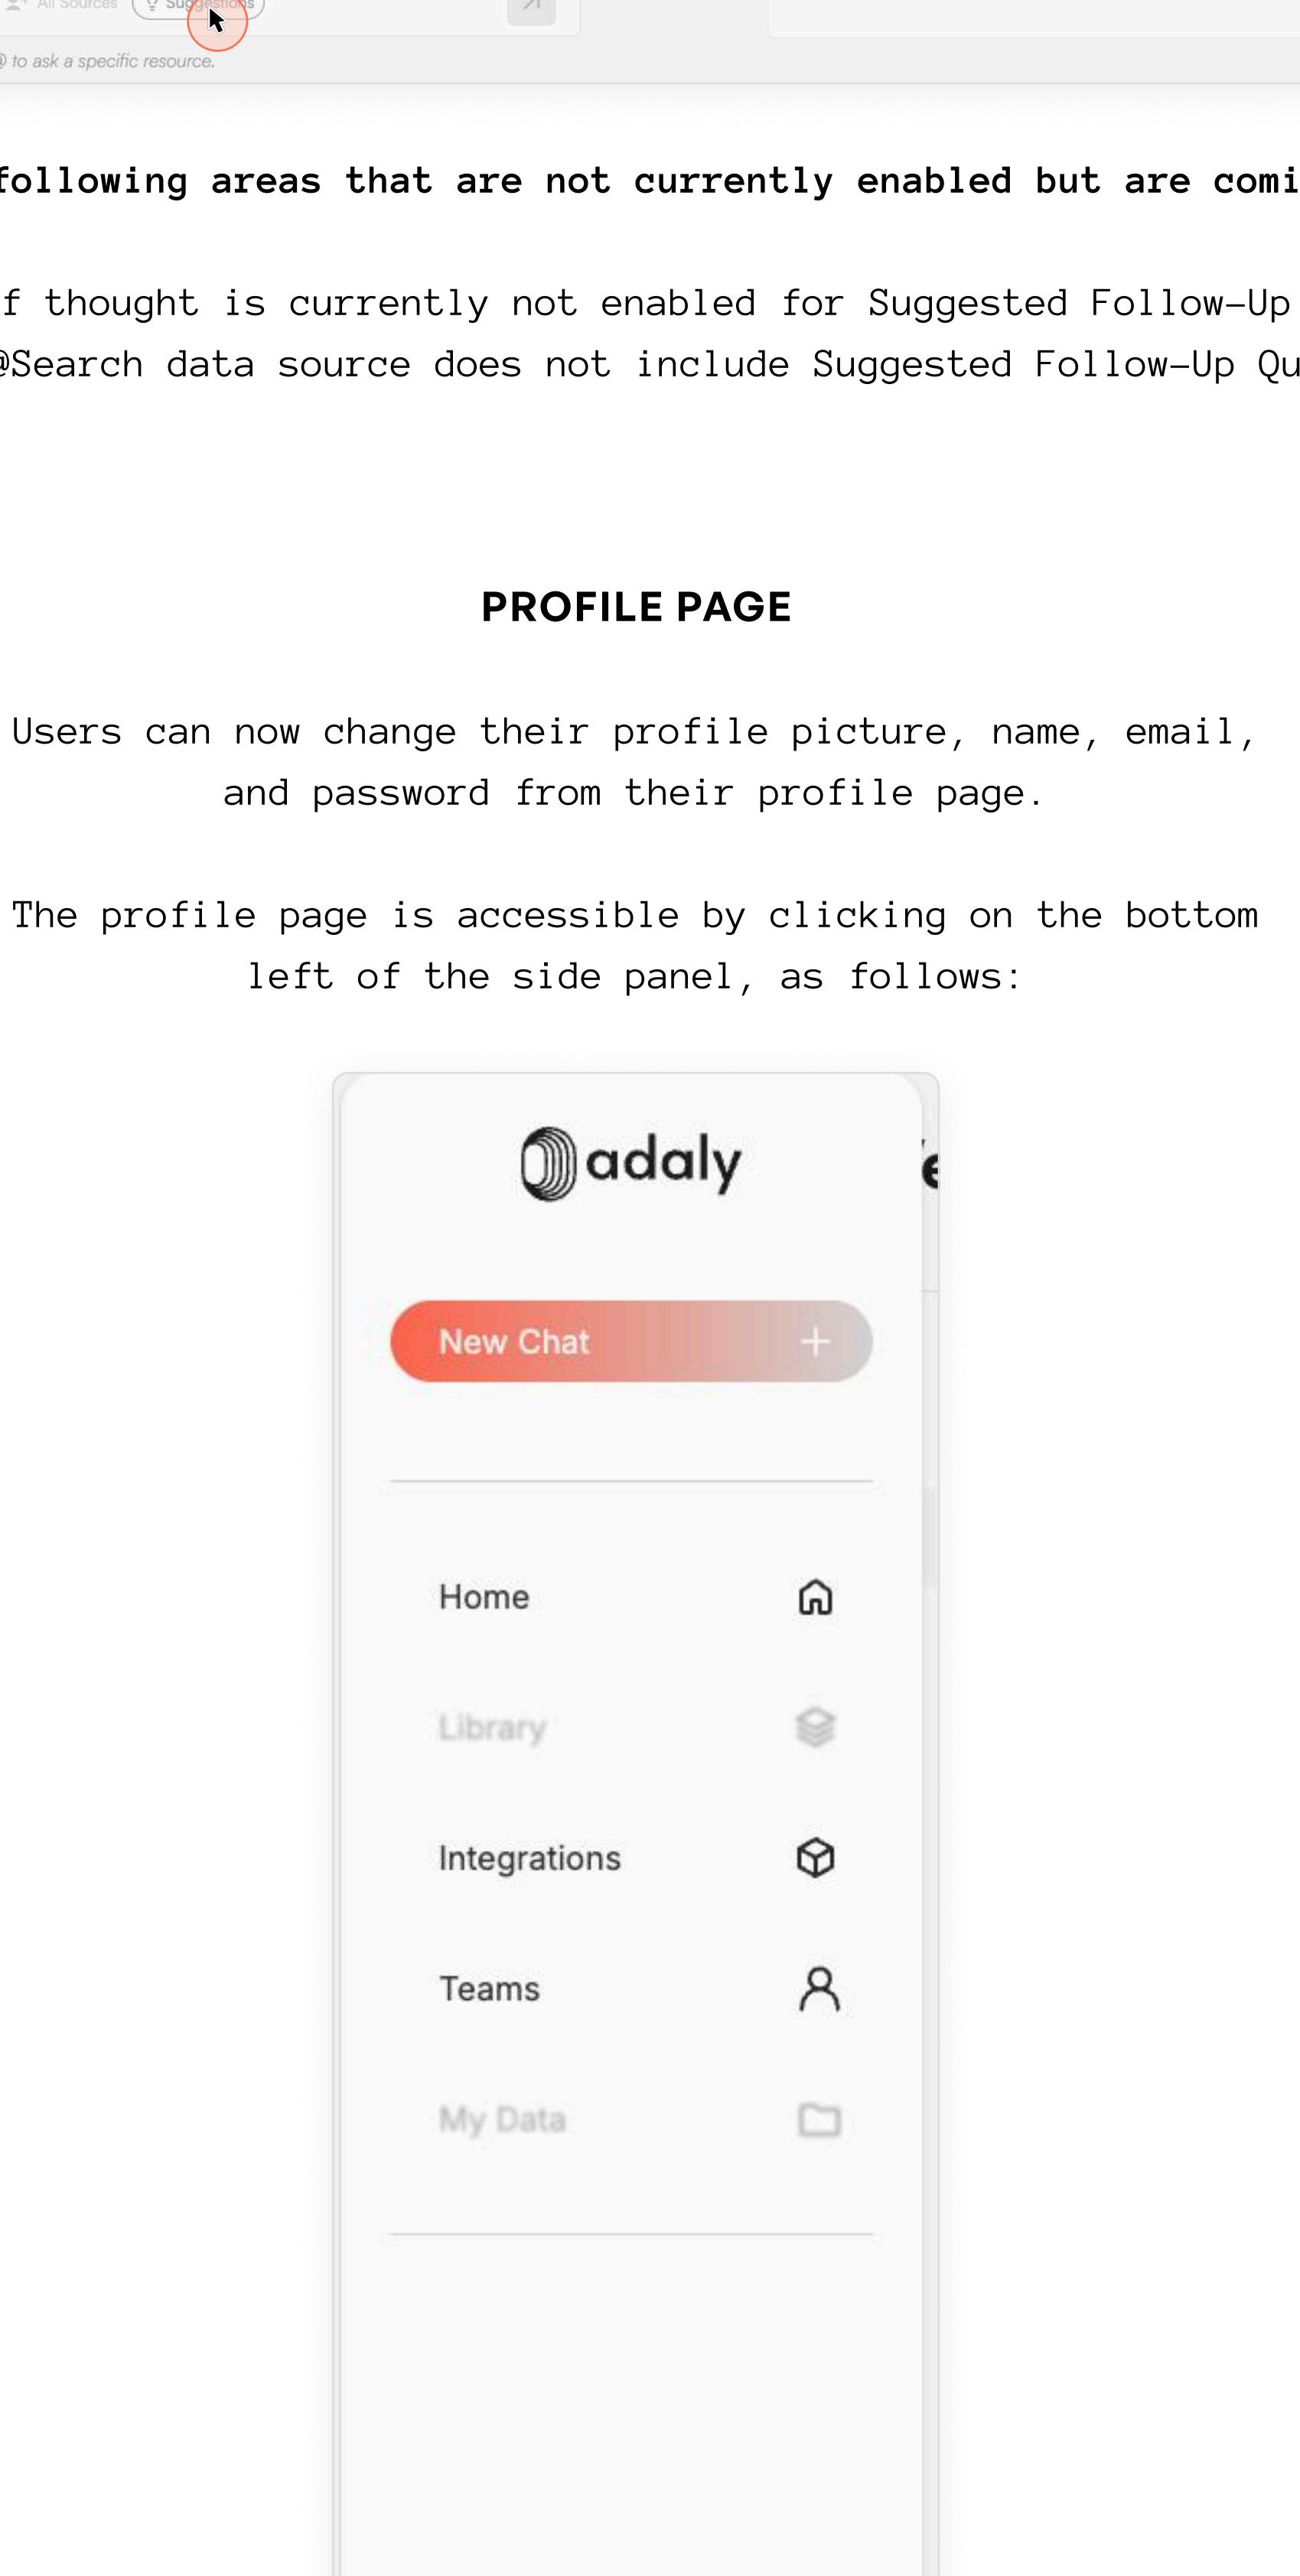

The newly updated chat experience walks the user through the process of selecting the appropriate data sources and then preparing the response.

Below is an example with the query "**Which brands are the most trusted in the technology sector?**"

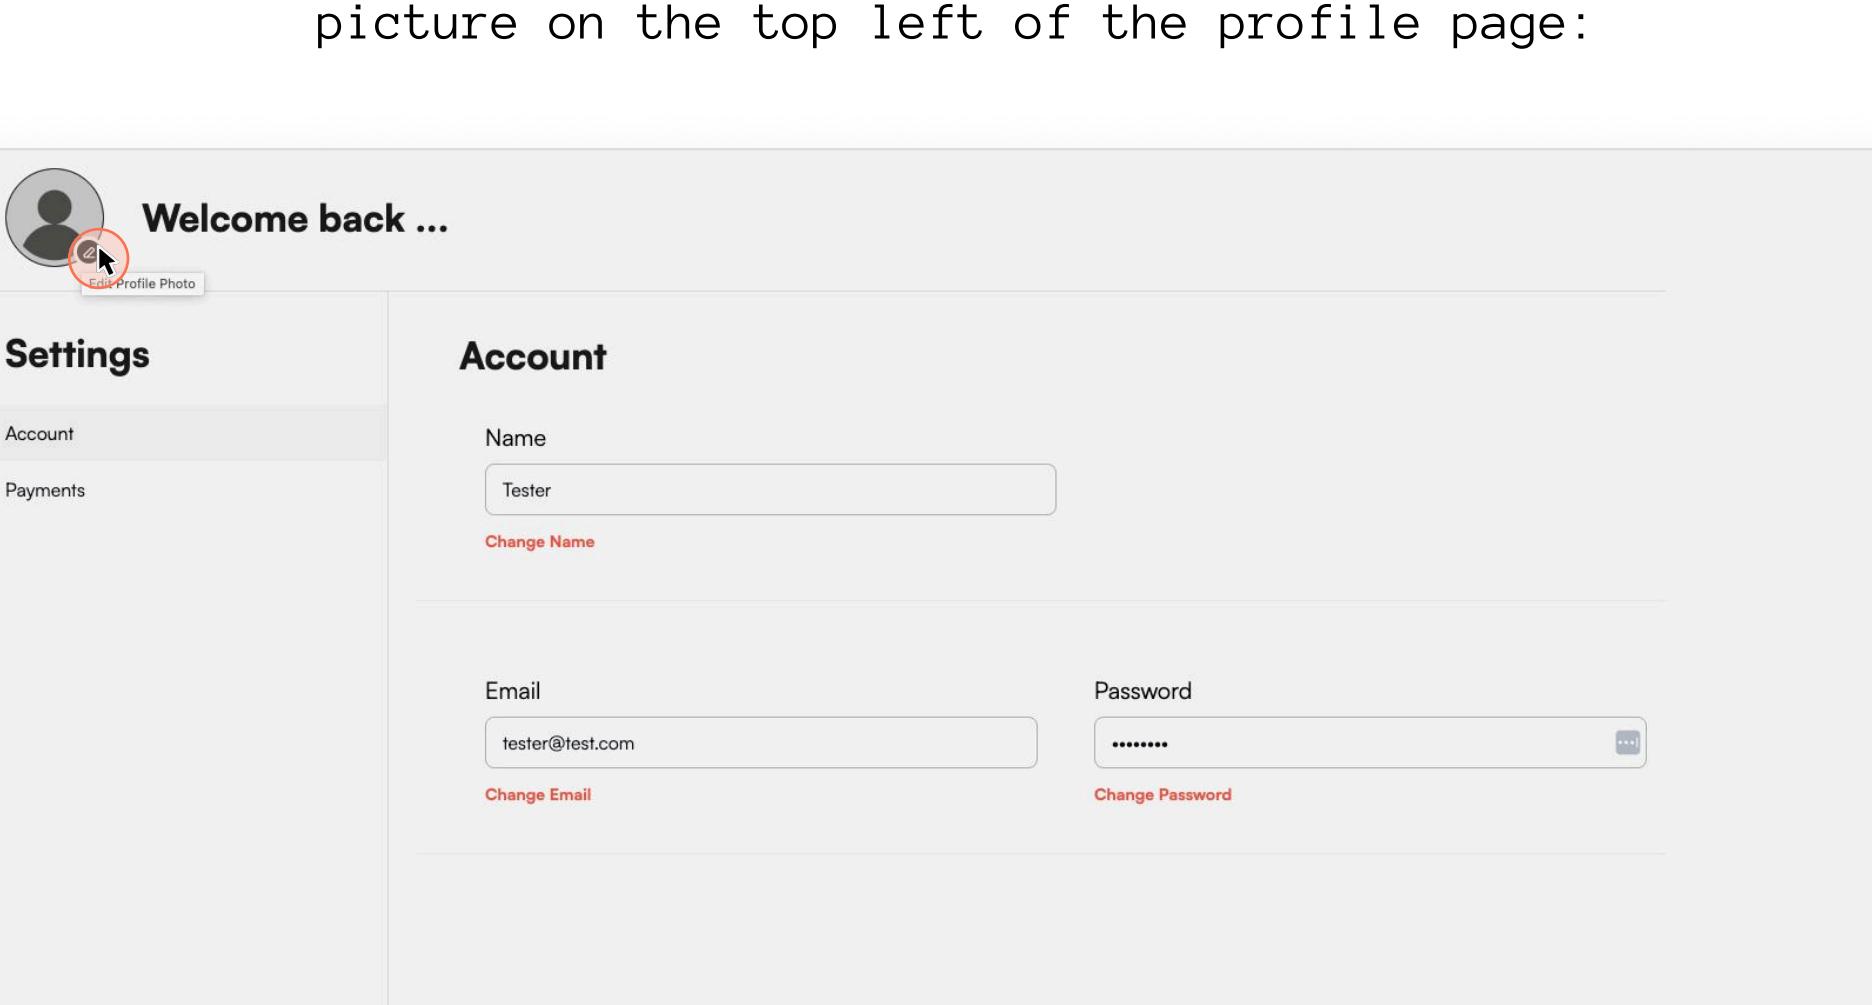

1. Adaly selects the appropriate data sources.

2. Adaly queries the data sources chosen.

3. Adaly prepares the response as before. A snippet can be seen below:

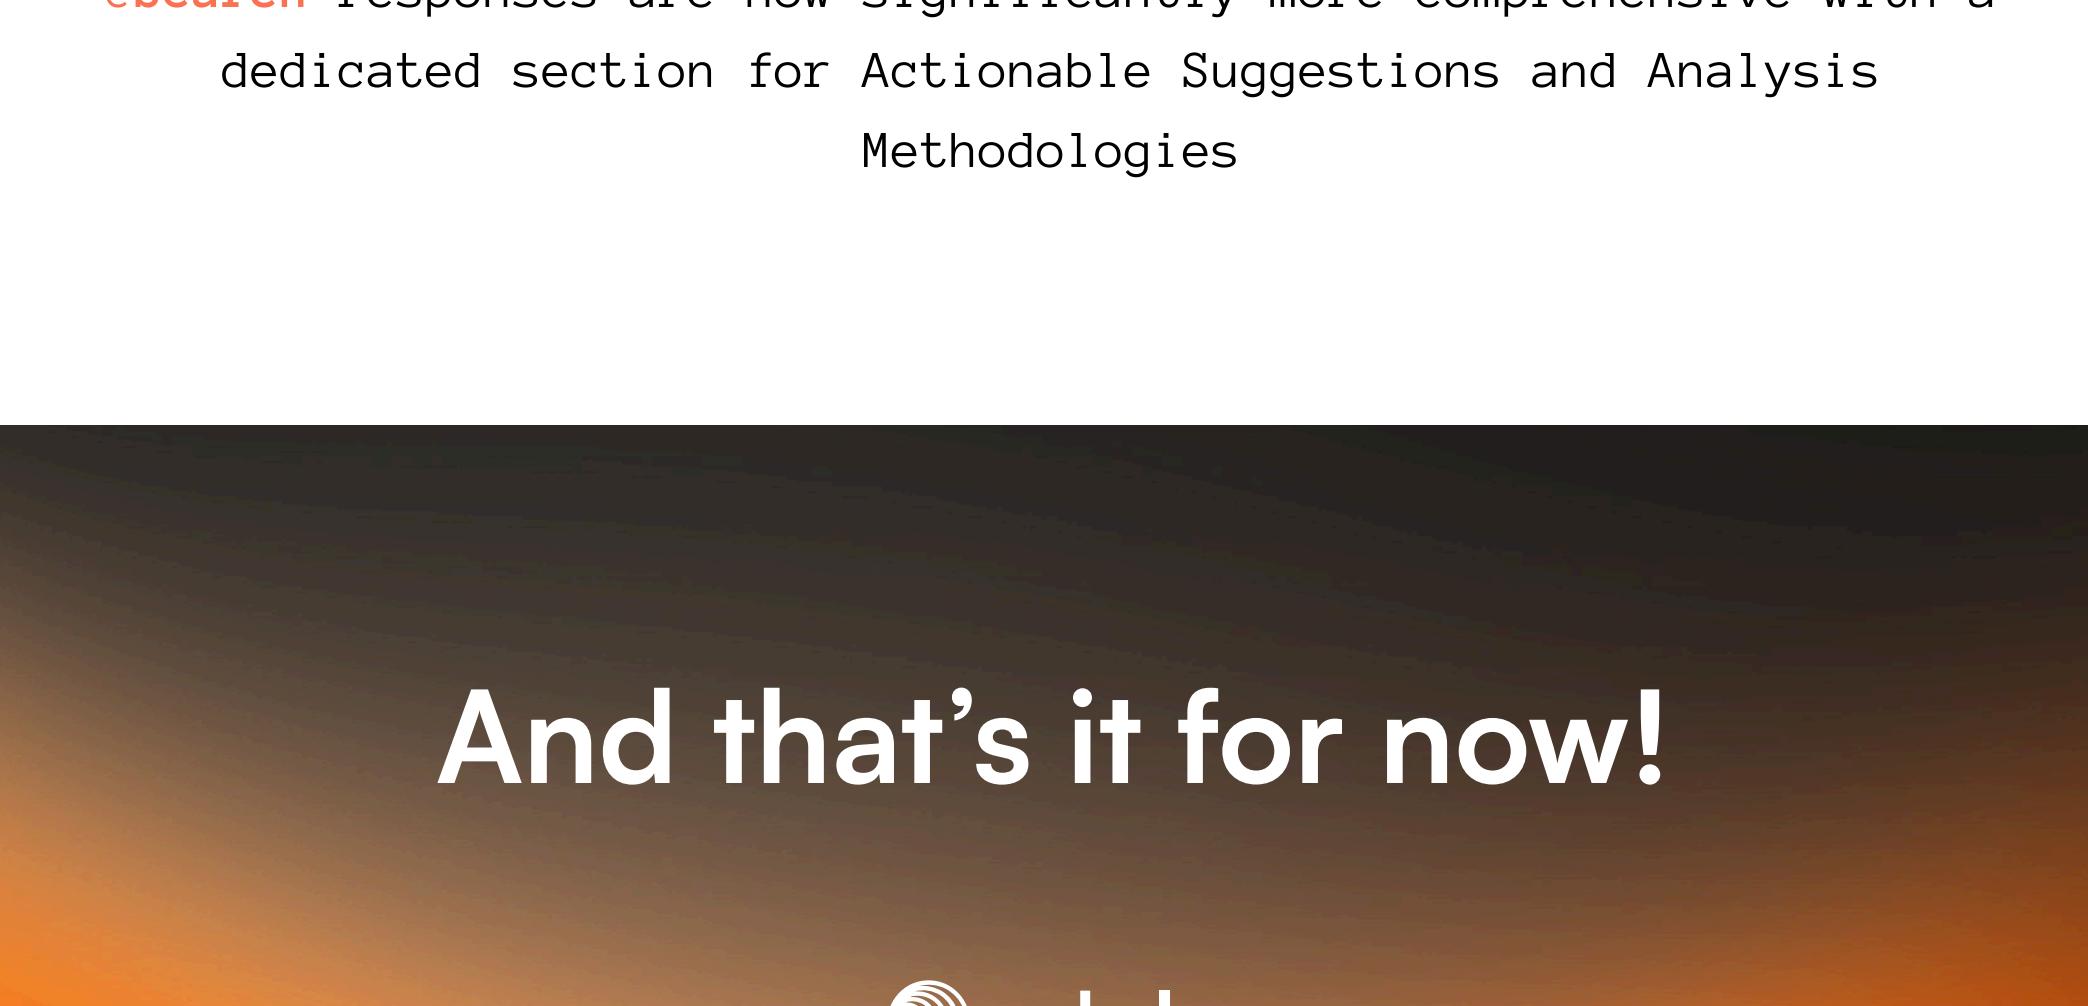

CHAIN OF THOUGHT

Users can now communicate conversationally with Adaly. Adaly utilizes the context of the previous 10 queries and responses in a single chat thread to inform the next answer with emphasis placed on recent conversations. Users can use this context to build upon answers from previous questions or pivot the conversation to a completely different topic.

Continuing the conversation from before, for example, a user could follow up with "**what about in the United States?**" or "**Explain this to me in simpler terms**". Users can also make use of our new Follow-Up Queries feature to continue the conversation.

An example can be seen below, continuing the conversation from the original query:

FOLLOW-UP QUERIES

Follow-Up Queries can be accessed by clicking on the "Suggestions" item in the chat bar. This opens up a list of relevant further queries that can be used to continue the conversation.

Note the following areas that are not currently enabled but are coming soon:

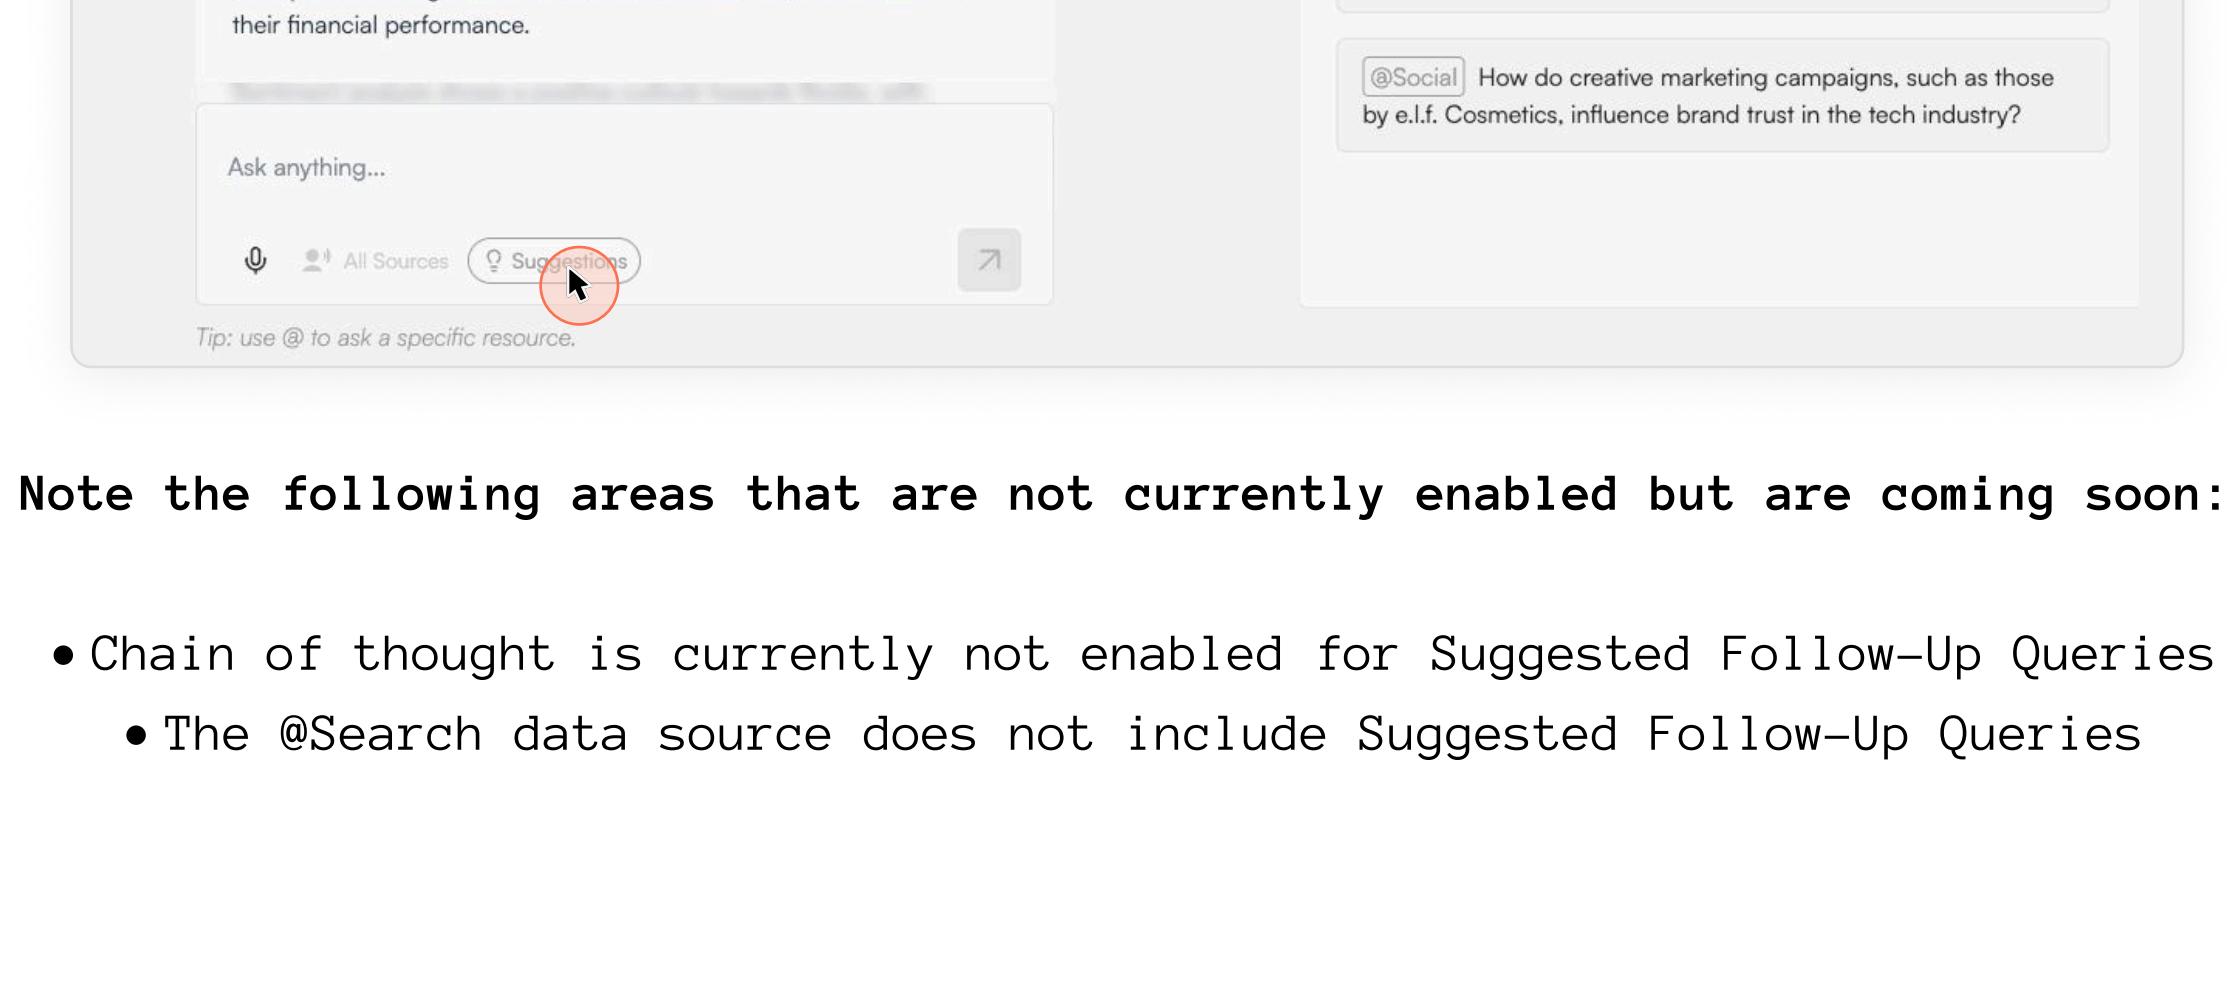

- Chain of thought is currently not enabled for Suggested Follow-Up Queries
- The @Search data source does not include Suggested Follow-Up Queries

PROFILE PAGE

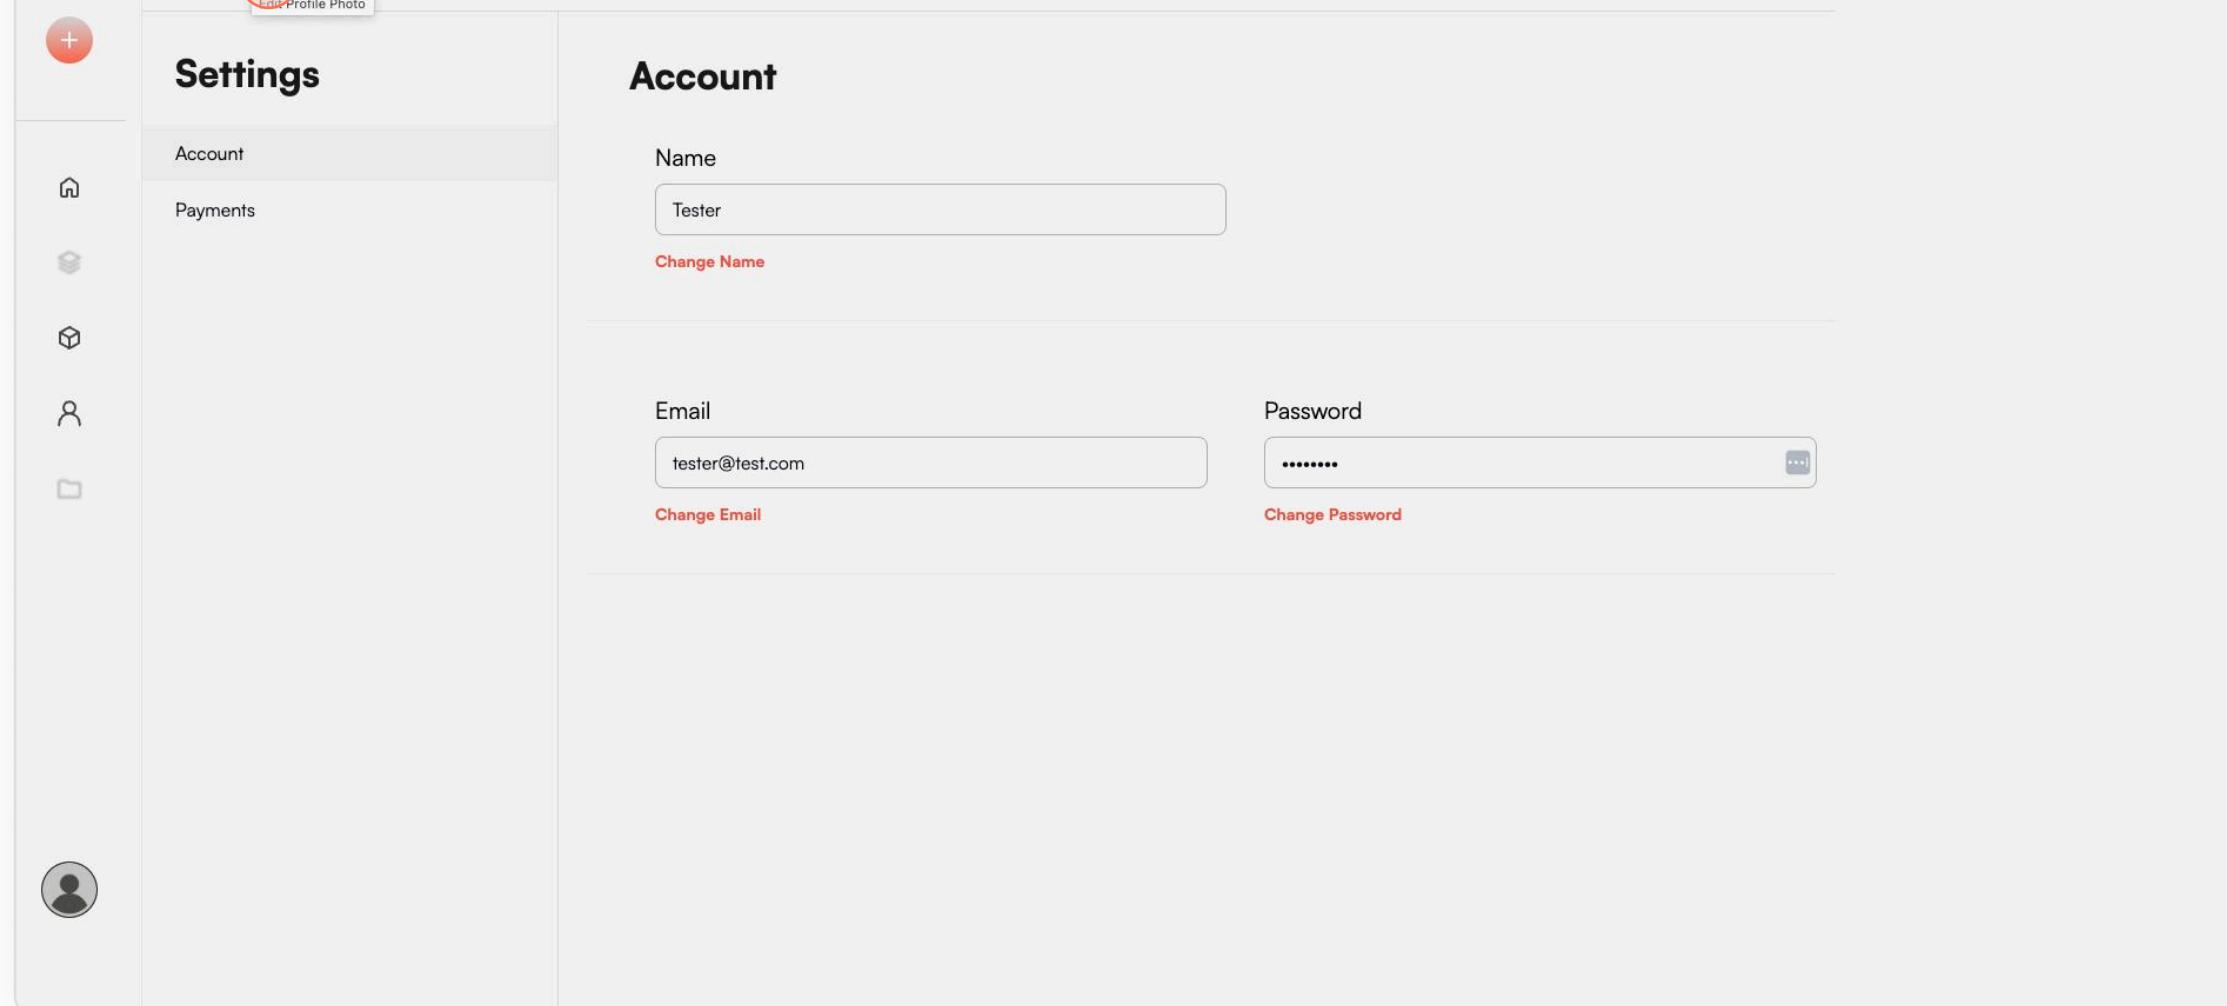

Users can now change their profile picture, name, email, and password from their profile page.

The profile page is accessible by clicking on the bottom left of the side panel, as follows:

To change the profile picture, users can click on the picture on the top left of the profile page:

Remaining changes can be made by clicking on "Change Name", "Change Email", and "Change Password", respectively.

Feature Enhancements

@Search responses are now significantly more comprehensive with a dedicated section for Actionable Suggestions and Analysis Methodologies

And that's it for now!
