Release Notes

FROM THE COMPANY MAKING MARKETERS POWERFUL.

Date: July 31, 2025
Version 2.2.0

Summary

We've made several meaningful updates to enhance access, flexibility, and functionality across the platform:

New Features

EXPANDED LLM ACCESS - Grok, ChatGPT

We've added support for Grok and ChatGPT:

- Grok can be utilized alongside X to retrieve real-time social media sentiment. This is a powerful way to keep your finger on the pulse of what audiences are saying.
- Our direct ChatGPT integration allows you to query the model directly within the platform.
- Simply input your own API keys to begin using these models in your workflows.

Optimizations

- We have enhanced performance across the platform. This improves the speed across the platform, especially on the Integrations page.
- Text-to-speech has been re-enabled, allowing users to play back and listen to the responses coming from the chat.

And that's it for now!
